DO MORE WITH LESS

What is CI/CD?

CI/CD is a set of method and best which automatize the process of building, testing and analayzing the code at the one side. This side that handles the codes belongs to CI. At the other side CD automatize the process of deploying, verifying and promoting the infrastructure needed for applications (CI part) to run.

Build   Test   Analayze   Deploy   Verify   Promote

Reduce time to market

- Developers **= less human errors = less bugs = avoid costs**

- Infrastructure = pay only what you use **= reduce costs**

- New product features = fast release **= increase revenue**

- Downtime **= react fast = protect revenue**

Improve User Experience

AUTOMATION HELPS IN BUILDING BETTER AND MORE CONSISTENT APPS **= MORE SATISFIED USERS**
